**AUTOMATIC BOX  
FORMING MACHINES**

## Formeca HME

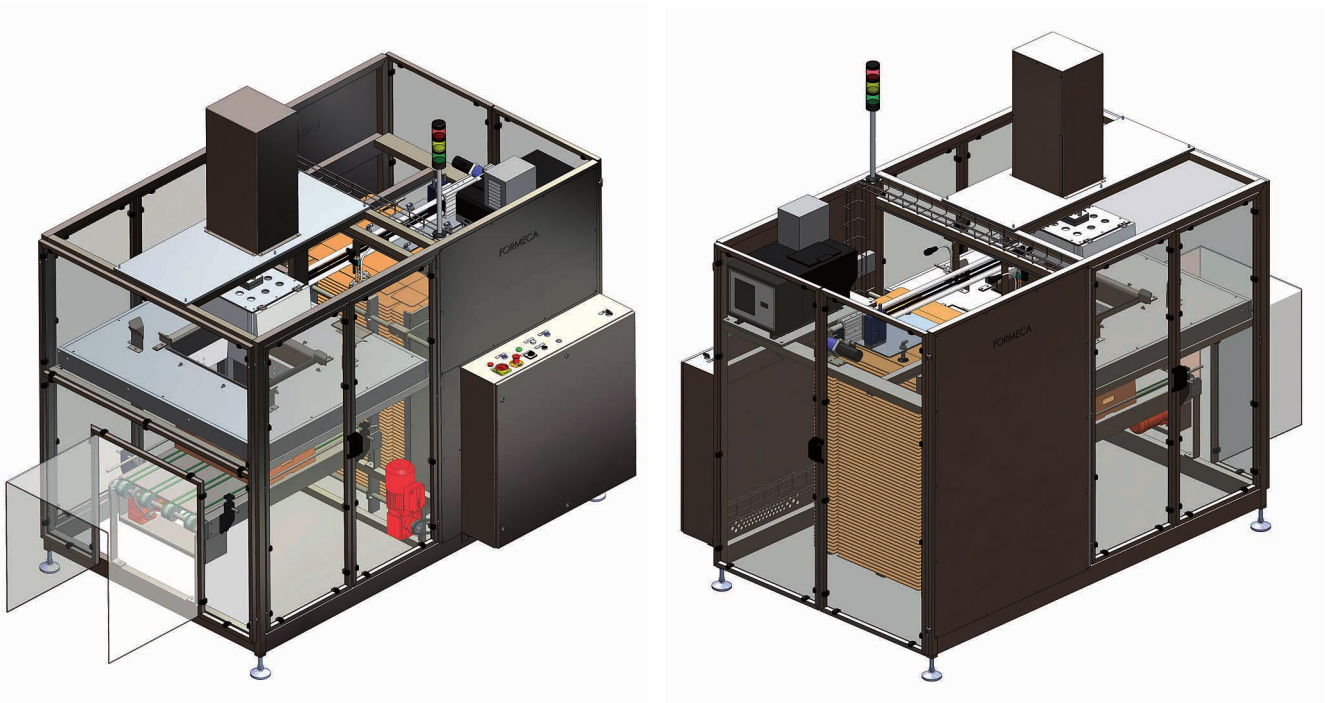

The new Formeca HME type box forming machines use hot melt adhesive and a forming tool to make medium-sized and large transportation packages from pre-cut corrugated cardboard blanks. HME is a cost-effective option for packaging that does not require a wide range of box sizes. It makes sturdy open boxes that are ideal for packaging garden and bakery products.

*Examples of box structure.*

Formeca HME does not require heavy investment to replace manual box forming with automated operation. This cost-effective box forming machine brings efficiency to seasonal packaging and facilitates packaging operations at peak times. Designed for large corrugated cardboard blanks, the HME makes sturdy open boxes of uniform quality at a rate of ten per minute. An HME machine making a single box size and design is easy to use and the lift-type blank magazine is also ergonomic. The machine is preadjusted for the customer's desired box type at the manufacturing stage, and is always tested at our factory before delivery.

All Formeca packaging machines are made in Finland. They can be modified for various box structures according to the requirements of the customer's packaging operation.

- lift type blank magazine
- machine dimensions (length/width/height) 2400 x 1500 x 2650 mm
- connections: 3 x 400VAC/50Hz electric power and 6 bar compressed air
- capacity of up to 10 boxes per minute
- box size minimum (length/width/height) 300 x 400 x 50 mm and maximum 400 x 600 x 200 mm

Formeca is part of the Finnish technology company Orfer Oy.
